

## PRODUCT DESCRIPTION

The **abCOR**-*Linear 30* panel combines the **abCOR**-ECCO Class A absorber, provided 30% of the timber product is open allowing no less than 40mm thick **abCOR**-ECCO plus our BLACK 2mm Needle Punch Face fitting tight between your stud and a Timber Slatted finish of your choice. This has been specifically designed to offer one seamless panel providing high absorption in the low to mid frequencies of sound and the flexible nature of the product works extremely well with design changes on site. All current design guides in the UK and Ireland like BB93 and TGD-026-1 "Acoustic Design of Schools" set strict criteria for mid frequency reverberation times. **abCOR**-*Linear 30* is ideal for Fit-outs and Lecture Halls. The **abCOR**-**ECCO** is manufactured using recycled plastic. Each 50mm thick panel can contain up to fifty 500ml plastic drink bottles per square metre.

## PRODUCT SPECIFICATIONS

Thickness:

Acoustic Performance:

## 25, 40 or 50mm **abCOR-ECCO**

Sizes:

Up to 3 metres in height. Width depending on stud.

	Product	Thickness mm	Sound Absorption Coefficient (when tested in accordance with BS EN ISO 354: 2003)					
			125 Hz	250 Hz	500 Hz	1000 Hz	2000 Hz	4000 Hz
	abCOR-Linear 30	25 40 50	0.18 0.40 0.44	0.41 0.73 0.86	0.73 1.07 1.11	0.94 1.12 1.11	1.00 1.01 1.01	0.95 0.94 0.96

Fire Rating:

**abCOR-ECCO** panels comply with the Class 'O' requirements of the Building regulations, when tested to BS476: Part 6: 1981 and Part 7: 1987. Absorbers with a spray painted finish do not have a fire rating. The composite absorbers have not been fire tested.

## Colour Range:

The Timber Slatts are finished to varnish or paint

"We are delighted with the work carried out by Donegan Acoustics, as your work in installing sound attenuation panels in our staff canteen has provided us with a comfortable acoustic environment in which to take our breaks once again. Prior to the installation of your acoustic panels, many staff had discontinued using the canteen for tea / lunch breaks and there was a noticeable decrease in camaraderie and morale in the offices. Without the panels, the reverberation of sound in this room was so significant that it was next to impossible to comprehend conversation across a table. In actual fact the sound quality in the room was nauseating. There was a sense of apprehension and disbelief amongst some staff that anything could be done to improve the situation but thankfully we are delighted to report that all staff are very happy with the impact of your work and are enjoying the benefit of proper rest breaks once again."

Eamonn Guilfoyle, Assistant Principal, Dept of Social Protection - Midlands North Division, Mullingar.
